EDUCATION

NIT Allahabad

Bachelor of Technology in Information Technology

- CPI: 8.97/10

Prayagraj, Uttar Pradesh

July 2019 – May 2023

WORK EXPERIENCE

Oracle

Software Engineer

Hyderabad, India

June 2023 – Present

- Built an LLM-powered agent to process natural language financial queries, leveraging hybrid search to understand user intent and deliver contextual responses, resulting in a 40% improvement in response accuracy.
- Designed and implemented dimensions, hierarchies, and 20 analytic views to enhance financial reporting and analytical capabilities. Improved report generation performance by 20%.
- Developed a Fusion Financials application within Oracle's internal microservice-based architecture, created and secured REST endpoints, ensuring reliable integration with downstream services.
- Led the migration of General Ledger and Subledger components from a monolithic architecture to microservices on Oracle ADB, while owning and managing the Accounting and Balances modules to ensure scalability and robustness.

Oracle

Software Engineer Intern

Hyderabad, India

June 2022 – July 2022

- Enhanced the stability and performance of the Financial module's Long Running Regression Tests (LRGs) in Oracle ERP Fusion by creating robust and efficient test cases, resulting in a 30% performance improvement and a 24% reduction in failure rates.
- Leveraged Java and SQL to address missing dependencies and output disparities, ensuring smoother execution of financial processes.

PROJECTS

INTERVIEW GUIDE – Github

April 2022

- A real-time interview platform with a collaborative code editor and whiteboard for live coding.
- Incorporated screen sharing, real-time chat, and audio/video calling to enable seamless communication during interviews.
- Technologies Used: React, Node.js, Express, Socket.io, WebRTC

CODEDOC – Github

December 2021

- A real-time collaborative coding platform enabling multiple users to solve problems together, with integrated chat, audio/video calls, and session sharing via unique collaboration keys.
- Implemented scalable multithreading with Java's ThreadPoolExecutor to support concurrent client connections, and multi-tab support for managing parallel collaborations seamlessly.
- Technologies Used: Java, MySQL, Java Socket Programming, Java Swing

TECHNICAL SKILLS

- **Programming Languages:** Java, C++, Python, JavaScript
- **Backend & Microservices:** Java (OOP), Microservices Architecture, Helidon, Node.js, REST APIs, Distributed Systems
- **Data & Storage Technologies:** MySQL, Oracle AI DB, MongoDB, RDBMS, NoSQL
- **Messaging & Streaming:** Kafka
- **AI/NLP:** Large Language Models (LLMs), Multimodal Agentic Systems, LangGraph, Vector Search, Keyword Search
- **AI-assisted Development Tools:** Cursor, GitHub Copilot
- **Libraries/Frameworks:** React, JUnit
- **Cloud & Other Platforms:** Oracle Cloud Infrastructure, Docker
- **CS Fundamentals:** Data Structures & Algorithms, System Design, Operating Systems, OOP, Software Development Life Cycle (SDLC), Agile Methodology

PUBLICATION

Multihop Path Selection for Vehicular Fog Computing

IEEE ANTS 2023 — Paper Link

Jaipur, India

December 2023

- Built a multi-hop path selection method for vehicular fog computing using staying time, hop count, and speed variance to improve task offloading.
- Achieved 7.08% and 2.3% higher offloading success rates compared to k-hop-limited and REPRO baseline methods, respectively.
